BUILDING IMMUNITY WITH VITAMINS

- The immune system produces it's own antioxidants to prevent cell damage.
- Vitamins, particularly antioxidants, prevent free radical damage to the immune cells.
- The top 3 vitamins that fall into this category are :
 - > Vitamin A
 - > Vitamin C
 - > Vitamin E

BUILDING IMMUNITY WITH VITAMINS

Vitamin A protects the skin and mucous membranes.

Sources : eggs, meat and dairy products

Vitamin C increases the number of the immune system cells.

Sources : citrus fruits such as oranges, strawberries, lemons and grapefruit

Vitamin E helps to maintain the structure of immune cells and tissue.

Sources : seeds and seed oils, margarine, avocados, wheat germ, egg yolks

RECIPE TO BOOST YOUR IMMUNE SYSTEM

JUICE RECIPE
FOR IMMUNITY

CARROT ORANGE JUICE

- 2-3 medium raw carrots, in small chunks (*vit A*)
- 1 $\frac{3}{4}$ cup water
- 2 cup orange juice (*vit C*)
- 1 teaspoon wheat germ (*vit E*)
- 1-2 teaspoon honey

Blend carrots with water until pulverized. Strain if desired. Combine carrot juice, orange juice, wheat germ and honey. Chill and serve. If unstrained, serve with a spoon to eat the carrot pulp and get an extra boost of fibre.
